

WEATHER DEFENDER™

Heat Pump Accessories

All Aluminum and Steel Accessories are Powder Coated

The Shed style Weather Protector Hoods defend against inclement weather conditions. These aluminum hoods will protect your heat pump from rain, snow, debris, and ice buildup, assisting in ensuring that your unit will run smoothly and efficiently. A 4" extension is available for added protection between the unit and the wall. The Peaked style Weather Protector Hoods also defend against inclement weather conditions. These traditional styled aluminum hoods are designed to withstand aggressive loads of snow and ice. The hoods all bolt directly to the unit using provided or existing screws.

stock #

FH 9-15	FUJITSU Standard Hood for 9,000- 15,000 BTU
FHEXT 9-15	FUJITSU Standard Hood plus 4" for 9,000- 15,000 BTU

MH 9-12	mitsubishi Standard Hood for 9,000-12,000 BTU
MH 18-24	mitsubishi Standard Hood for 18,000-24,000 BTU

Wall extensions are used when ice and snow fall from the eaves into the gap between the hood and wall, causing a buildup that affects the functionality of the heat pump. These extensions are available in 6" and 8" depths to provide the necessary coverage over that gap. These are attached to the wall above the hood, using supplied screws.

stock #

FWEXT6 9-15	FUJITSU 6" Wall Extension for 9,000-15,000 BTU
FWEXT8 9-15	FUJITSU 8" Wall Extension for 9,000-15,000 BTU

When the standard wall brackets are not desired, these durable steel stands are the answer. Their rugged design provides a solid base for your heat pump. Available in 16" or 24" heights, or units with leg extensions are available, allowing these to be adjusted anywhere in between 16"-24" for optimum height.

FRSF 18-36	FUJITSU Pre-filter fits 18,000-36,000 BTU

The Anti-Vibration Isolation Kit is used to "isolate" the vibrations going from the heat pump through the wall. This is achieved using a spring/rubber combination. Instructions are included.

stock #

HP IK	Anti-Vibration Kit for heat pumps
-------	-----------------------------------

The Heat Pump Cleaning Kit helps to maintain your indoor unit for optimal efficiency. Packed in a sturdy reusable tube. Includes a Filter Saver™ Nylon Bristled Cleaning Brush to easily wipe lint and dust from the main heat pump filters as needed to maintain optimum efficiency and air flow, 2 replaceable cotton mop attachments to clean the crevices of the unit, a solid handle for the mops, an environmentally friendly 1 oz. spray bottle to keep the exposed surface looking like new, and two 100% cotton, no scratch heat pump wipes.

Refills for the kit are also sold separately
